## REASONS FOR ALLOWANCE

1. The following is an examiner's statement of reasons for allowance:

Claims 1-10 are allowed over the prior art of record because none of the prior art of record teaches or fairly suggests the claimed feature of receiving a latency value through address inputs of the integrated memory, as recited in claims 1, lines 2-3 and claim 9, lines 3-4.

Any comments considered necessary by applicant must be submitted no later than the payment of the issue fee and, to avoid processing delays, should preferably accompany the issue fee. Such submissions should be clearly labeled "Comments on Statement of Reasons for Allowance."

### *Conclusion*

2. The prior art made of record and not relied upon is considered pertinent to applicant's disclosure.
  - a. Zagar et al., 5,544,124, teaches an optimization circuitry and control for a synchronous memory device with programmable latency period.
  - b. McLaury, 5,655,105, teaches a multiple latency synchronous DRAM including separate two and three latency circuits.
  - c. Jeong, 6,154,415, teaches an internal clock generating circuit of a semiconductor device.
  - d. Schrogmeier et al., 6,804,165, teaches a latency time switch for an SDRAM having a controllable latency time generator for generating an adjustable latency time.
